TROPICAL CYCLONE BULLETIN NO. 16

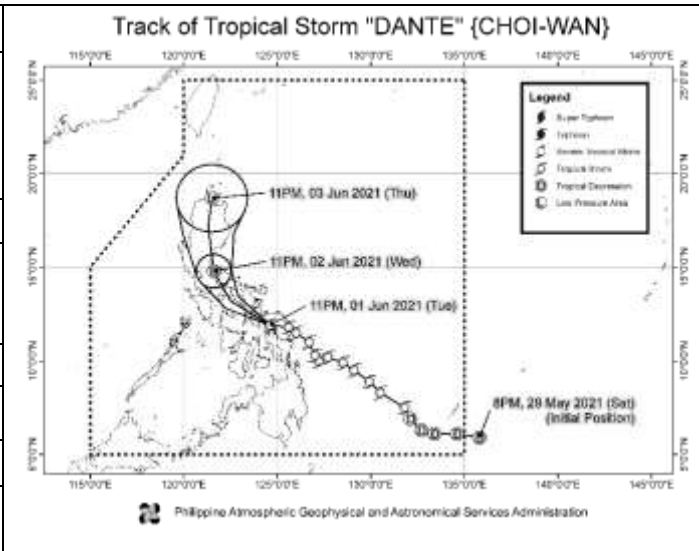

Tropical Storm "DANTE" (CHOI-WAN)

Issued at 2:00 AM, 2 June 2021

Valid for broadcast until the next bulletin at 5:00 AM today

HAZARDS AFFECTING LAND AREAS
<p>Heavy Rainfall</p> <p>Today, Tropical Storm "DANTE" is forecast to bring:</p> <ul style="list-style-type: none"> Moderate to heavy with at times intense rains over Biliran, Leyte, Southern Leyte, the northern portion of Cebu including Camotes and Bantayan Islands, the northern portion of Negros Occidental, Aklan, Capiz, the northern portion of Antique, the northern and eastern portions of Iloilo, Masbate, and Romblon. Moderate to heavy rains over the rest of Western Visayas, the rest of Central Visayas, Samar, Occidental Mindoro, Oriental Mindoro, Calamian and Cuyo Islands, Quezon including Polillo Islands, and Camarines Norte Light to moderate with at times heavy rains are also likely over Metro Manila, Central Luzon, the rest of CALABARZON, the northern portion of mainland Palawan, the rest of Visayas, the rest of Bicol Region, Dinagat Islands, and Camiguin Under these conditions and considering antecedent rainfall, scattered to widespread flooding (including flash floods) and rain-induced landslides are expected, especially in areas with high or very high susceptibility to these hazards as identified in hazard maps. Adjacent or nearby areas may also experience flooding in the absence of such rainfall occurrence due to surface runoff or swelling of river channels. <p>Severe Winds</p> <ul style="list-style-type: none"> The tropical storm will bring strong winds to gale-force winds over the areas where Tropical Cyclone Wind Signal #2 is hoisted. Such conditions may bring generally light to moderate damage to structures and vegetation. Strong winds (strong breeze to near gale) which may cause generally very light damage to structures and vegetation will be experienced in areas where TCWS #1 is in effect.
HAZARDS AFFECTING COASTAL WATERS
<ul style="list-style-type: none"> In the next 24 hours, rough to very rough seas will be experienced over the seaboard of areas where TCWS #2 is in effect and the remaining seaboard of Bicol Region. Sea travel is risky for small seacrafts over these waters. Mariners without the proper experience should immediately seek safe harbor. Moderate to rough seas (1.2 to 3.0 m) over the seaboard of areas where TCWS #1 is in effect (apart from Catanduanes), the remaining seaboard of Visayas, the seaboard of Caraga, the eastern seaboard of Davao Oriental, and the northern seaboard of Northern Mindanao. Mariners of small seacrafts are advised to take precautionary measures when venturing out to sea. Inexperienced mariners should avoid navigating in these conditions.
TRACK AND INTENSITY OUTLOOK
<ul style="list-style-type: none"> After making landfall at in the vicinity of Cataingan, Masbate at 1:00 AM today, "DANTE" will continue moving generally west northwestward in the next 12 hours and cross Masbate in the next 3 to 6 hours. Afterwards, the storm is forecast to track west northwestward or northwestward towards Quezon and Aurora before turning more northward tomorrow morning over the rugged terrain of Northern Luzon. Due to increased vertical wind shear and land interaction, "DANTE" is forecast to maintain its strength in the next 12 hours before eventually weakening into a tropical depression later today. However, there is an increasing possibility that the storm will be downgraded to tropical depression category at an earlier time frame.

Considering these developments, the public and disaster risk reduction and management offices concerned are advised to take all necessary measures to protect life and property. Persons living in areas identified to be highly or very highly susceptible to these hazards are advised to follow evacuation and other instructions from local officials. **For heavy rainfall warnings, thunderstorm/rainfall advisories, and other severe weather information specific to your area, please monitor products issued by your local PAGASA Regional Services Division.**

Unless an intermediate bulletin is released, the next tropical cyclone bulletin will be issued at 5:00 AM today.
